SUMMARY

Solutions-oriented ML Developer with commercial freelance experience in deploying predictive models and automated analytics tools. Strong focus on applying statistical modeling, and R to build robust data pipelines and transform complex raw data into actionable business intelligence.

EDUCATION

2024 — 2028

Lublin University of Technology, Bachelor's Degree(in progress)

Currently studying Artificial Intelligence in Business with focus on data analysis, statistics, and machine learning.

Gaining practical experience in Python, R, and real-world data projects.

SKILLS

Backend: Python (FastAPI), SQL (PostgreSQL), REST APIs, Docker, Linux, Git, WebSockets.

Data & Analytics: Data Analysis, ETL Pipelines, pandas, R/RStudio, Statistics & Regression.

Machine Learning & AI: scikit-learn, Predictive Analytics, Statistical Modeling, Generative AI.

LANGUAGES

Ukrainian Polish Russian English

Experience

Freelance Python Developer — MBS Analytics & Reporting Tool

Developed a standalone Python desktop application to process raw Bloomberg exports and automate analytics for 800+ Mortgage-Backed Securities (MBS).

Engineered overnight BUY/SELL idea scans, calculated financial metrics like Z-scores and payups, and enabled CLI scheduling for automated chart generation.

Impact: Packaged the tool as a portable zero-installation executable, processing 800+ MBS instruments daily. This bypassed strict IT restrictions and reduced manual Excel reporting workflows from hours to a 2-minute automated process for client pitches.

Data Engineering & Predictive Analytics

Implemented predictive machine learning models using Python (scikit-learn) and R, ensuring algorithms are backed by rigorous mathematical validation.

Built clean data pipelines and ETL processes in team environments, transforming complex raw data into structured formats.

Collaborated with stakeholders to translate business reporting needs into automated analytical tools, optimizing data-driven decision-making.

CERTIFICATIONS AND LICENSES

IBM SkillsBuild – Trustworthy AI Enterprise Solutions (2026),

IBM SkillsBuild – AI Solutions with Advanced Algorithms (2026)

IBM SkillsBuild – Generative AI in Action (2026)
